

The background is a blurred image of a financial market dashboard. It features various stock indices and their values, such as 'OMX COPENHAGEN 25 INDEX' at 10916.69, 'OMXRG1' at 6025.9680, 'OMX18' at 28289.06, and 'OMX ICELAND 8' at 6230.9. There are also line charts showing market trends and 'Buy'/'Sell' indicators. The overall color scheme is blue and red, typical of financial data visualizations.

HEALTHCARE SECTOR PERFORMANCE DASHBOARD

Name: Alex Nite

METHODOLOGY OVERVIEW

Data Source

- MeridianMarketFlow API – Bulk Financial Statements endpoint

Scope

- 10 major U.S. healthcare companies
 - JNJ | PFE | MRK | ABBV | BMY | AMGN | GILD | MDT | ABT | TMO
- Quarterly income statements from Jan 1, 2022 – present

Fields Used

- ticker, periodEndDate, fiscalYear, period, revenue, costOfRevenue, grossProfit, operatingIncome, rdExpense, netIncome

Software Used

- PowerBI

DATA PIPELINE SUMMARY

1. API → CSV Extraction

- Retrieved quarterly income statement data using the MeridianMarketFlow Bulk Financial Statements API
- Exported results as a CSV containing all 10 tickers from 2022–present

2. Power Query Transformations

- Removed unused fields from the API response
- Ensured column names matched required DAX fields exactly
- Added Quarter Label computed column: fiscalYear & "-" & period

3. Data Model Structure

- All aggregations were implemented as measures and not calculated columns
- Time slicer was synced across all pages.

KEY DAX MEASURES

Revenue (Large-Cap)

- **DAX Formula:** Revenue (Large-Cap) = `CALCULATE(SUM(Income[revenue]), Income[revenue] > 10000000000)`
- **What It Does:** Applies a row-level filter to include only quarters where revenue exceeded \$10B.
- **Business Question:** *“How much revenue is generated during true large-cap performance quarters?”*

Revenue (High R&D)

- **DAX Formula:** Revenue (High R&D) = `CALCULATE(SUM(Income[revenue]), Income[rdExpense] > 2000000000)`
- **What It Does:** Filters to quarters with R&D spending above \$2B.
- **Business Question:** *“How much revenue is associated with heavy innovation periods?”*

Revenue (ex-JNJ)

- **DAX Formula:** Revenue (ex-JNJ) = `CALCULATE(SUM(Income[revenue]), Income[ticker] <> "JNJ")`
- **What It Does:** Removes JNJ from the calculation to isolate the rest of the sector.
- **Business Question:** *“What does sector revenue look like without its largest player?”*

KEY DAX MEASURES

Revenue Rank

- **DAX Formula:** Revenue Rank = RANKX(ALL(Income[ticker]), [Total Revenue], , DESC)
- **What It Does:** Ranks companies from highest to lowest revenue, ignoring any slicer filters on ticker.
- **Business Question:** “Who are the largest players in the healthcare sector?”

Group Total Revenue

- **DAX Formula:** Group Total Revenue = CALCULATE([Total Revenue], ALL(Income[ticker]))
- **What It Does:** Removes the ticker filter to compute total revenue for all 10 companies.
- **Business Question:** “What is the total revenue of the entire sector, regardless of slicer selections?”

% of Group

- **DAX Formula:** % of Group = DIVIDE([Total Revenue], CALCULATE([Total Revenue], ALLSELECTED('Income Statement'[ticker])))
- **What It Does:** Calculates each company's share of total sector revenue.
- **Business Question:** “How dominant is each company relative to the full group?”

FINDINGS

- **Sector Concentration**

- Total sector revenue: **\$1.99T**
- JNJ alone: **\$387.9B** → **19.52%** of the entire sector
- Top 3 (JNJ, PFE, MRK) = **45%** of total revenue

- **2. Growth Divergence (Classic Insight)**

- AMGN: **+9.95%**
- JNJ: **+6.05%**
- PFE: **−29.24%**
- MRK: **−24.24%**
- GILD: **−25.17%**

Revenue 2025 and Revenue 2024 by ticker

ticker	Total Revenue	% of Group	Revenue Rank	Growth 2024 to 2025
JNJ	\$387,920,000,000	19.52%	126	6.05%
PFE	\$269,377,000,000	13.55%	159	-29.24%
MRK	\$232,177,000,000	11.68%	178	-24.24%
ABBV	\$213,248,000,000	10.73%	205	-20.93%
BMY	\$187,659,000,000	9.44%	222	-0.22%
TMO	\$162,992,000,000	8.20%	242	-24.58%
ABT	\$158,581,000,000	7.98%	245	-21.65%
MDT	\$146,353,000,000	7.36%	254	3.62%
AMGN	\$124,688,000,000	6.27%	274	9.95%
GILD	\$104,669,000,000	5.27%	303	-25.17%
Total	\$1,987,664,000,000	100.00%	3	-12.59%

FINDINGS

- **Innovation Drives Profitability (Interesting Insight)**
 - Revenue (High R&D): **\$1T**
 - High-R&D margin leaders:
 - MRK: **31.46%**
 - GILD: **29.40%**
 - AMGN: **20.98%** **Why it matters:** High R&D spend correlates with stronger margins and long-term resilience.
- **Large-Cap Quarters Drive Sector Stability (Interesting Insight)**
 - Revenue (Large-Cap): **\$2T**
 - JNJ, MRK, PFE consistently exceed \$10B/quarter **Why it matters:** Large-cap performance anchors the sector.

ticker	2021	2022	2023	2024	2025	2026	Total
ABBV		20.39%	8.95%	7.63%	5.41%		10.98%
ABT		15.88%	14.27%	31.95%	14.45%		19.43%
AMGN		24.89%	23.83%	12.24%	20.98%		20.11%

GILD		16.83%	20.89%	1.67%	29.40%		16.30%
JNJ	19.09%	18.90%	41.28%	15.84%	28.46%		25.44%
MDT		15.90%	12.03%	11.36%	13.90%	13.76%	13.36%
MRK		24.49%	2.09%	26.68%	31.46%		20.75%
PFE		31.01%	9.22%	12.62%	20.92%		20.16%
TMO		15.50%	13.90%	14.78%	14.67%		14.72%
Total	19.09%	21.01%	17.44%	12.49%	20.38%	13.76%	17.79%

2T

Revenue (Large-Cap)

1T

Revenue (High R&D)

FINDINGS

- **Sector Strength Without JNJ (Unique Insight)**
 - Revenue (ex-JNJ): **\$1.63T**
 - Removing JNJ reduces total revenue by ~20%
 - But remaining companies show **more balanced growth**

163T

Revenue (ex-JNJ)

FINDINGS

Total Revenue by Quarter Label

- **Post-Pandemic Normalization:**

High revenue peaks in 2022 followed by a steady return to baseline through 2024.

- **2025 Recovery Sign:**

Recent data shows revenue stabilizing and beginning to trend upward in early 2025.

- **Quarterly Rhythms:**

Consistent fluctuations across quarters reflect predictable industry reporting cycles.

- **Reporting Lag:**

The late 2025 dip is an artifact of 3 missing reports (157/160 total), not a shift in sector strength.

CONCLUSION

Dominance of the "Big Three": JNJ, PFE, and MRK control 45% of the sector's total revenue, with JNJ alone anchoring the group at 19.52%.

The Innovation Premium: High-innovation quarters (R&D > \$2B) show a direct correlation with superior net profit margins, specifically for MRK and GILD, who maintain levels above 25%.

Post-Pandemic Normalization: The sharp revenue correction seen throughout 2024 has stabilized, with 2025 quarterly data indicating a new performance "floor".

Divergent Growth Paths: While the sector average is down, individual outliers like Amgen (AMGN) achieved +9.95% growth, proving that company-specific strategy is now outperforming broad market trends.

RECOMMENDATIONS

- Increase positions in companies like Amgen (AMGN) that demonstrate positive growth momentum (+9.95%) independent of sector-wide contractions.
 - Retain JNJ as a core holding to hedge against volatility, given its massive \$387.9B revenue footprint and consistent profitability.
 - Focus future investments on 'High R&D' leaders (MRK, GILD) who demonstrate the best conversion of innovation spending into net profit.
 - Continue tracking the 2025-Q4 reporting cycle—verified by the 'Number of Reporting Quarters' metric—to confirm the recovery trend holds for all 10 tickers.
-

THANK YOU
